

Assignment :

1. Add the resume folder containing the resume files to the existing workspace.
2. write a prompt to implement a batch ingestion workflow for resumes.
3. Configure the workflow to process resumes in batches of 5 or 10 files per run.
4. Validate the ingestion process by testing multiple batches and verifying that all resumes are successfully ingested.

Prompt to make multiple ingestion:

Start implementing the multiple-resume batch ingestion workflow phase by phase.

Implement only one phase at a time. After completing each phase, provide:

- The files changed and a brief description of the changes
- The exact Postman method, URL, headers, and request body
- The expected successful response and relevant error responses
- The tests/build results

I will test the phase in Postman. After I share the result and explicitly approve, proceed to the next phase.

[STRICT] DO NOT PROCEED TO THE NEXT PHASE UNTIL I APPROVE.

[STRICT] DO NOT IMPLEMENT MULTIPLE PHASES AT ONCE.

[STRICT] DO NOT HALLUCINATE. Inspect the existing project and follow the phase-wise implementation file already in the workspace. Do not add requirements or behavior that are not supported by that file or explicitly approved by me.

[STRICT] Preserve the existing project's routes, response format, validation, error handling, logging, persistence, and duplicate-handling behavior unless the approved phase requires a change.

The workflow should support multiple resumes per request and process them in batches of 5 by default, with an option for 10 if the phase-wise implementation file specifies it. Accept only PDF files. Return an individual result for every file, continue processing valid files when another file fails, and clearly report each success or failure.

Do not say a phase is complete just because the build or tests pass. Wait for my Postman result and explicit approval before starting another phase.

For Postman verification, explain that:

- HTTP 200 means every file in that request succeeded.
- HTTP 207 means the batch was processed but at least one file failed; explain how to inspect the individual results.
- Other HTTP status codes mean the request or batch was rejected, and the phase must not be treated as approved.

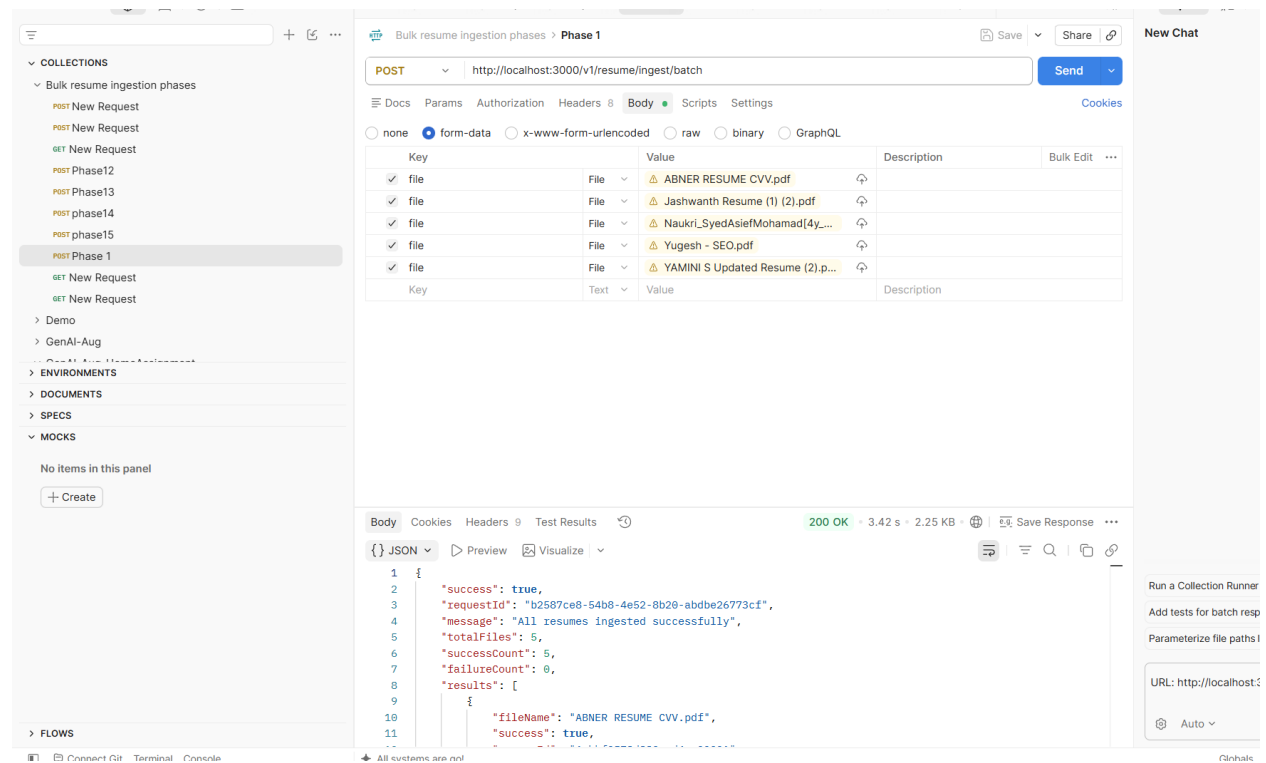

Do not proceed to the next phase solely because an HTTP 200 response was returned. Wait for my explicit approval.

Ingestion file:

Multiple_Resume_Bat
ch_Ingestion_Guide.m

Step by step process:

The screenshot displays the Postman interface for a REST client. The left sidebar shows a collection named "Bulk resume ingestion phases" with a sub-collection "Phase 1" selected. The main panel shows a POST request to "http://localhost:3000/v1/resume/ingest/batch". The request body is set to "form-data" and contains five files: "ABNER RESUME CVV.pdf", "Jashwanth Resume (1) (2).pdf", "Naukri_SyedAsiefMohamad(4y...)", "Yugesh - SEO.pdf", and "YAMINI S Updated Resume (2).p...". The response is a 200 OK status with a 3.42 s response time and 2.25 KB of data. The response body is shown in JSON format, indicating a successful ingestion of 5 files.

Request Details:

- Method: POST
- URL: http://localhost:3000/v1/resume/ingest/batch
- Body Type: form-data
- Files:
 - file: ABNER RESUME CVV.pdf
 - file: Jashwanth Resume (1) (2).pdf
 - file: Naukri_SyedAsiefMohamad(4y...
 - file: Yugesh - SEO.pdf
 - file: YAMINI S Updated Resume (2).p...

Response Details:

- Status: 200 OK
- Time: 3.42 s
- Size: 2.25 KB
- Body (JSON):
