

Activity 1:**1) Find 10 different model providers and their models released in last 12 months**

Model Provider	Model	Release Date	Cutoff Date	Cost of Tokens (Input/Output per 1M)	Context Window	Type	When to Use
OpenAI	GPT-5.5	Apr 23, 2026	Dec 1, 2025	\$5 / \$30	1.05M (128K max output)	Proprietary, closed	Complex professional work, agentic coding, computer use, first true 1M-context OpenAI model
Anthropic	Claude Opus 4.8	May 28, 2026	Jan 2026	\$5 / \$25 (Fast: \$10/\$50)	1M (128K max output)	Proprietary, closed	Advanced coding, long-horizon agents, high-stakes reasoning, dynamic multi-subagent workflows
Google	Gemini 3.1 Pro	Feb 19, 2026	Jan 2025	\$1 / \$6	1M (64K max output)	Proprietary, closed	Multimodal reasoning, agentic workflows, computer use, large-document analysis
xAI	Grok 4.5	Jul 8, 2026	Not disclosed	\$2 / \$6	500K	Proprietary, closed	Coding, agentic tasks, technical/math problem-solving with configurable reasoning

Model Provider	Model	Release Date	Cutoff Date	Cost of Tokens (Input/Output per 1M)	Context Window	Type	When to Use
Meta	Muse Spark 1.1	Jul 9, 2026	Not disclosed	\$1.25 / \$4.25	1M	Proprietary, closed-weight (Meta's pivot away from open Llama)	Agentic tasks, tool/computer use, coding, multimodal understanding — powers Meta AI
DeepSeek	V4-Pro	Apr 24, 2026 (GA Jul 20, 2026)	Not disclosed	\$0.435 / \$0.87	1M (384K max output)	Open-weight (MIT)	Ultra-low-cost frontier-level reasoning, coding, self-hosted agentic workflows
Mistral AI	Medium 3.5	Apr 29, 2026	Not disclosed	\$1.50 / \$7.50	256K	Open-weight (Modified MIT)	Coding, agentic workflows, enterprise self-hosting, unified reasoning+chat+coding
Alibaba	Qwen3.8-Max	Aug 3, 2026	Not disclosed	\$2 / \$6	1M (128K max output)	Proprietary (open weights promised)	General frontier tasks, multimodal (text/image/video), cost-efficient alt to Western frontier
Moonshot AI	Kimi K2.6	Apr 20, 2026	Not disclosed	\$0.58–0.60 / \$2.50–3.40	256K	Open-weight (Modified MIT)	Long-horizon coding, coding-driven UI generation, multi-

Model Provider	Model	Release Date	Cutoff Date	Cost of Tokens (Input/Output per 1M)	Context Window	Type	When to Use
							agent swarm orchestration
Zhipu AI (Z.ai)	GLM-5.2	Jun 13, 2026	Not disclosed	~\$1.22–1.40 / \$4.40	1M (128K max output)	Open-weight (MIT)	Long-horizon agentic coding, project-level software engineering, sovereign/self-hosted deployments

"Open-weight" models (DeepSeek, Mistral, Moonshot, Zhipu) can be self-hosted, which changes the cost calculus entirely vs. proprietary API-only models.
